• Color: blue

## Comfort - Body Pillow

The SISSEL® Comfort Body Pillow provides optimal positioning for all ages! It is perfect for daily relaxation and support of babies, children and adults. It can be used during or immediately after pregnancy to relax individual body parts in certain positions; for example the abdominal wall and perineum can be specifically relaxed while resting in a supine or lateral position. After pregnancy, the Comfort Body Pillow is ideal for nursing, as it takes the strain off the arms and shoulders. It is also an ideal aid for positioning and care of the elderly.

Our polypropylene pillow is washable up to 95°C, sterilizable up to 140°C, and weighs approximately 1.2 kg. There is no loss of volume due to the multiple shock resistance of the slightly larger beads and there are no harmful vapors. The SISSEL® Comfort Body Pillow is very suitable for use in hospitals, nursing homes, therapy or in your own home.

• Size: 195 x 35 cm (6'-5" x 14")

## Orthopedic Pillow Soft

Offers increased isolated pressure distribution, along with slightly reduced support or correction intensity to provide the ideal pillow for sensitive neck patients.

All SISSEL® Memory Foam Pillows feature substantial support to the lower cervical spinal column. As a result the entire shoulder and neck region is well-supported. Due to its unique angle, the memory foam pillow glides between shoulder and cervical spinal column and fills the space between, which gently leads the spinal column into the anatomically correct position. The unique edge of all SISSEL® Orthopedic Pillows guarantees ideal support of your shoulder when in a lateral position, thus relieving vertebrae and intervertebral discs. A slight stretching effect on neck and spinal column might make the change feel unusual at first. Your body will require a little time (2 to 14 nights) to once again get used to a healthy natural sleep. We recommend using the pillow a short

period of time every night rather than spending a sleepless night and possibly giving up after a few nights. Once you are used to it you will not want to be without it. SISSEL® Plus, Classic and Travel orthopedic pillows consist of polyurethane foam, which has a high support capacity. SISSEL® Soft, Deluxe and Bambini orthopedic pillows, on the other hand, are made from memory foam; a very smooth material. The SISSEL® Memory Foam Pillow Soft incorporates the advantages of the millionfold proven classic SISSEL® shape. Due to its viscoelastic properties it simultaneously offers increased isolated pressure distribution together with slightly reduced support or correction intensity. This is the ideal pillow for sensitive neck patients. The SISSEL® Orthopedic Pillow Soft comes with an ivory colored pillow case. • Size: 47 x 33 x 14 cm (19" x 13" x 5.5")

## Orthopedic Pillow Plus

All SISSEL® Orthopedic Pillows feature substantial support to the lower cervical spinal column. As a result the entire shoulder and neck region is well-supported. Due to its unique angle, the pillow glides between shoulder and cervical spinal column and fills the space between, which gently leads the spinal column into the anatomically correct position. The unique edge of all SISSEL® Orthopedic Pillows guarantees ideal support of your shoulder when in a lateral position, thus relieving vertebrae and intervertebral discs.
